

VECTRA® E130ID-2 VD3005 BLACK

RoHS – EU-Directive 2011/65/EC (from June 8th,2011):

Restriction of the use of certain Hazardous Substances in electrical and electronic equipment

WEEE – EU-Directive 2002/96/EC (including 2003/108/EC):

WEEE = Waste on Electrical and Electronic Equipment

EU-Directive 2003/11/EC:

Restriction of Pentabromodiphenylether and Octabromodiphenylether

DECABROMDIPHENYL-ETHER

Dear Customer,

Ticona, a producer of Advanced Engineering Polymers (polymer compounds), does not fall under the scope of the EU Directive 2011/65/EC. However, to help economic operators in the supply chain to comply with the rules laid down in Directive 2011/65/EC Ticona confirms that based on Ticona's manufacturing process and the raw materials used, the substances listed in Annex II of this Directive are not expected to be present in the above mentioned product in concentrations exceeding the maximum values given.

In accordance with the self commitment of the plastic manufacturing industry in 1986 we do not use Polybrominated Biphenyls (PBB) and Polybrominated Diphenylethers (PBDE) in the above mentioned products. Since this includes Pentabromo-diphenylether and Octabromodiphenylether these products also comply with EU-Directive 2003/11/EC. The above mentioned product does by constitution not contain any Decabromodiphenylether. Therefore it is in accordance with the new decision of EuGh (European court of justice) that forbids the use of Decabromodiphenylethers in polymeric applications.

The WEEE-Directive regulates disposal and recycling of electrical and electronic waste. Compliance with the restrictions of this directive can only be confirmed by the producer of the final product. However, for the above mentioned products of TICONA we confirm that

they do not contain any substances listed in Annex II of this directive (2002/96/EC) as an intentional ingredient.

Analysis of the heavy metals and brominated substances listed in Annex II of the RoHS directive is not part of our production process on a routine basis and no actual values can be provided.

The presence of trace amounts cannot be excluded.

Ticona GmbH,
Product Safety.

Important: This information relates only to the above mentioned materials as delivered in their original packaging. It does not relate to any product made of these materials with or without the inclusion of further additives, such as processing aids or colorants. This information should not be construed as a promise or guarantee of specific properties of the products described or their suitability for a particular application.
